

THE BOTTLE SPECIALIST

more than gifts

As The Bottle specialist we have more than 40 bottle models. These bottles we have in more than 150 different variations including different kind of materials and colours.

These items can be personalised with 8 printing techniques. So create your conscious promotion and choose from our variety of sustainable and durable bottles.

We also stay innovate and that's why we want to introduce to you 2 new printable solutions on bottles: Digital printing 360 and Laser engraving 360.

As The Bottle specialist we offer you:

- **one-stop-solution:** a variety of bottles from stock which can be personalised and also a selection which you can personalise completely
- with a **total price of product and print**
- with **one invoice and freight costs**
- with **highest speed delivery**
- and **one point of contact**

As midocean, we invite you all to discover our bottle collection and our new printable solutions...

Printing techniques

THE BOTTLE SPECIALIST
/2021

New: Digital printing 360

Your bottle can be printed now all the way around. With these 360 option, your reusable bottles stand even out more.

Full colour digitally printed bottles combine the technology of UV inkjet digital printing with rotary print capabilities. This technique allows to print full colour images with fresh, vibrant colours around bottles and other cylindrical items.

New: Laser engraving 360

If you want a luxurious print effect you can choose now for Laser engraving 360.

Laser engraving 360 makes it possible to realise an engraved design on the circumference of cylindrical items like bottles. This is a durable printing option on a bigger surface for the best personalised gift with maximum brand exposure.

More printing techniques...

Having your logo or design printed with the widest range of printing techniques has never been so easy. Next to our new printable solutions we have some more options to personalise your bottle.

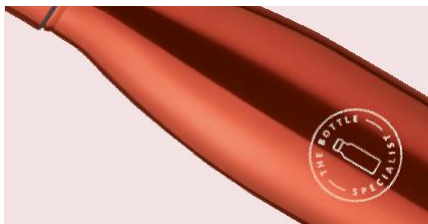

Round screen print

Round screen printing is a method that allows round personalisation. It is an optimum solution for the popular reusable bottles since, due to its form, the print position is larger than can be achieved using the traditional printing

Sublimation

Sublimation is one of the few methods you can print full coloured images onto hard surfaces or polyester coated items. Number of colours is unlimited for complete customized logos.

Pad Printing

Pad printing is a technique where rubber stamps are used to print the logo on the item. With this technique you achieve a sharper finish and a perfect colour matching (PMS) is achievable.

Digital label

Digital Label is used on items where no other technique can be applied. With this method full colour label is printed and stuck on the most optimum position of the product.

Laser Engraving

Laser engraving can be applied to items made of natural materials like wood and metals. With laser engraving the result of branding is precise, clean and permanent.

Doming

The doming procedure consists of printing the logo on a self adhesive label domed with an epoxy resin layer. It is a durable solution and cannot be easily scratched or dented.

Drinkware
for every
occasion

THE BOTTLE SPECIALIST
